## SUMMARY

---

I am a dedicated and detail-oriented undergraduate student pursuing a Bachelor's degree in Data Science. With a strong passion for data science, I have honed my skills in leveraging tools such as Tableau and Microsoft Office. My academic background, combined with practical experience, equips me with the ability to analyze data effectively and present findings in a clear and impactful manner.

## WORK EXPERIENCE

---

**Chair of Research, Faculty of Mathematics and Natural Sciences,** 2023  
**State University of Surabaya**

- Led a research project titled "Prediction of depression from speech data".
- Coordinated with team members to gather, analyze, and interpret speech data.

**Staff Member, Advocacy and Student Welfare Division, Data** 2024 - 2025  
**Science Student Association, State University of Surabaya**

- Actively participated in initiatives to advocate for student welfare.
- Assisted in organizing events and programs aimed at improving student support services.

## PROJECTS

---

**Prediction of Depression from Speech Data** [Link to Demo](#)

- Developed a predictive model to identify depression indicators from speech data.
- Presented the project outcomes at the university research symposium.

**Sentiment Analysis of KIPK Recipients based on Tweets from X** [Link to Demo](#)

- Analyzed sentiment of tweets related to KIPK recipients to gauge public opinion Used NLP.
- Visualized results using data visualization tools to highlight key findings.

## EDUCATION

---

|                |  |
|----------------|--|
| 2022 - present | S.Si.D (Bachelor of Data Science) at <b>State University of Surabaya</b> (GPA: 3.37/4.0) |
| 2022           | Class 12th, Some Board (Grades)  |
| 2019           | Class 9th, Some Board (Grades)   |

## SKILLS

---

|                     |   |
|---------------------|---|
| Data Analysis Tools | Python, Tableau, Microsoft Office                                     |
| Additional Skills   | Data Mining, Machine Learning, Data Visualization, Team Collaboration |
